MEMORANDUM FOR: Chief, Plans Staff, DD/S

SUBJECT : FY 1974 Program Estimates

REFERENCE : Memo dtd 9 Mar 72 to DD/S fm D/L,  
same subject

1. At your request, attached is a listing of the Agency components which would, in accordance with current planning, be affected by the construction of an addition to the Printing Services Building.

2. It should be noted that the referenced memorandum indicated that the Office of Basic and Geographic Intelligence (OBGI) components in the Magazine Building would move into the Headquarters Building, occupying space vacated by the Office of Logistics (OL). Further analysis disclosed that the space vacated by OL would not be sufficient to accommodate OBGI. Recognizing this factor, current planning contemplates the move of these OBGI elements to the Ames Building.

3. Construction of the addition to the Printing Services Building, as proposed and which includes approximately 16,000 square feet of new consolidated storage space for OL, will result in an overall Agency increase of approximately 4,873 net square feet. The Magazine Building would, of course, be vacated and released to the General Services Administration.

4. It must be remembered that this elaborating data on the proposed expansion of the Printing Services Building, in the same sense as was the justification given in our FY 1974 program submission, is absolutely subservient to the organizational dynamics of the Agency. As evidence of this statement, we should like to point out that, when our original planning was done for the Printing Services Building expansion, certain of the principal constituent elements of [REDACTED] were not known; i.e., expansion for the current Intelligence Community Staff and the establishment of [REDACTED]. These two developments have impacted on space in the Magazine Building. It is not only perfectly possible, but it is also probable, that we will never be able to define with absolute certitude the actual occupants of an expanded Printing Services Building until such time as the structure is in being.
